XD

Desktop Static Inkjet Printer

This image only supplies the reference, please take the actual product as the standard.

XD desktop static inkjet printer is a portable desktop printer, equipped with self-developed T260E thermal inkjet printer and mobile module. Just press the start button (optional sensor or foot switch), the printhead can move automatically to complete the printing. The device uses a 7-inch industrial-grade color touch screen, which can arbitrarily edit the text, numbers, QR codes, and patterns to be printed; the module motor adopts self-locking control, self-locking position when power is off, and returns to the origin when power is on, ensuring the convenience of use and transportation. It is simple to use and suitable for a variety of scenarios.
